

Lesson One: Photo Montage

Student Objective: Create a Photo Montage out of recycled photographic images, using overlapping, foreground, middleground, and background to show space and depth within your image. Choose and maintain a common theme in response to the prompt that you choose.

Prompt: In your Photo Montage choose one of the following prompts as a theme.

1. A place (real or imaginary) that is important to who you are as a person.
2. An image that tells a story of who you are as a person.
3. Your biggest goal or dream.

Sketchbook Preparation: Before you get started on the final piece, dedicate a page of your sketchbook to a quick thumbnail sketch of the layout (emphasizing foreground, middleground and background). State the prompt you are following and write one sentence describing your sketch and how it relates to the prompt you chose. Once your thumbnail is complete and quickly reviewed by me, get to work collecting images and creating your piece.
